Objektbeschrijving:

This plot in Son Toni extends over an area of more than 2,000 square meters and represents an exceptional opportunity, especially because there are only a few plots in the whole of Mallorca that offer such a plot size on urban building land.

The plot is projected to be divided into 2 separate plots, taking advantage of the natural boundaries. One plot has 1,130 square meters and the other 1,174 square meters.

The plots are being sold with a basic project, whereby the future owner still has the freedom to carry out the distribution of the premises according to his own ideas during construction.

The quiet and secluded location at the end of a cul-de-sac, situated on a slight hill, offers not only privacy and tranquillity, but also a picturesque view of the surrounding countryside, nestled in an exclusive residential area.

The total planned volume of the submitted building project is 1,572 m³.

The constructed area of house "B" is 249.48 sqm, with an additional 16.25 sqm for terraces (50%) and 11.67 sqm for pergolas (25%).

House "A" has a constructed area of 242.25 sqm with an additional 27.67 sqm for terraces (50 %) and 6.00 sqm for pergolas (25 %).

The total constructed area is 553.32 sqm. In addition, each house has a swimming pool of 42.00 sqm.

It is also possible to purchase the plots separately. The price per building plot is € 395,000 or both together € 775,000.
